

Grookai Visual Search Review

Instructions for PokeJavi - how to sign in, review search results, inspect the complete visual evidence, and export your work.

This portal is read-only. Your decisions do not approve cards, edit descriptions, or write anything to Grookai. Draft progress stays only in your browser until you export a JSONL file.

Open the portal

<https://grookaivault.com/review/visual-search>

Scan the QR code or open the link in a desktop browser.

Sign in

- 1 Open the link**
You should be sent to the normal Grookai Vault sign-in page.
- 2 Use your existing Grookai account**
Sign in the same way you normally access Grookai. You do not need a separate reviewer account.
- 3 Return to the review portal**
After sign-in, Grookai should automatically send you back to the Visual Search Review dashboard.
- 4 Confirm your reviewer name**
The Reviewer key field should show **PokeJavi**. Do not change it.

Best setup: use a desktop or laptop, stay in the same browser, and avoid private/incognito mode.

How to review each search

Each page represents one visual-search query. Your job is to decide whether every returned card actually satisfies that query when the complete image and saved visual facts are considered.

1

Read the query

Start with the large query title, its concepts, and the canonical subject if one is listed.

2

Look at every result image

Judge the visible artwork, not the card name alone. A query such as **sky** may also require checking clouds, trees, terrain, shadows, or whether the background is not actually a sky.

3

Open the evidence

Click **Search match evidence - click to inspect image** or **Full saved Fact Graph**. The dialog shows the card image beside all saved observations and typed facts.

4

Choose a result judgment

Use the dropdown under each card. Apply the same standard to every result.

Judgment	Use it when
Highly relevant	The artwork is a direct, strong example of the search intent.
Relevant	The requested subject, object, setting, action, or visual trait is clearly present.
Acceptable alternate	The result is useful but indirect, partial, unusually framed, or a reasonable secondary interpretation.
Not relevant	The result does not meaningfully satisfy the query, even if a nearby or generic concept matches.
Must exclude	The result contradicts the query or would be actively misleading in search results.

5

Add an evidence note when useful

Briefly record the visible reason for a difficult decision, especially for a wrong match, missing detail, contradiction, or ambiguous image.

6

Finish the query

Choose the query decision, add any applicable failure labels and notes, then click **Complete**. Use **Next** to continue.

What to check

The short green evidence line explains why search matched the card. It is not the complete description. Always open the full evidence when the image contains more detail than the match line shows.

- Is the primary subject correct?
- Are secondary subjects, cameos, objects, and background details visible and useful?
- Are pose, action, anatomy, clothing, expression cues, and orientation supported by the image?
- Are environment claims such as forest, sky, weather, buildings, water, or terrain actually visible?
- Do counts and repeated elements make sense?
- Does the complete Fact Graph omit a meaningful visible detail?
- Would a collector reasonably expect this card from the search query?

Saving and exporting

Your work is saved only in this browser on this device. It is not uploaded to Grookai while you review.

- Return with the same browser and device to resume your draft.
- Do not clear site data, browser storage, or cookies while work is in progress.
- Do not use incognito/private mode; the browser may erase the draft when the window closes.
- Click **Export JSONL** regularly and again when the assigned review is complete.
- Send the downloaded **.jsonl** file back to the Grookai founder for review.
- Exporting does not approve or publish anything. The file is reviewed and validated later.

If something goes wrong

Problem	What to do
Login returns to the login page	Confirm you used your existing PokeJavi Grookai account, then reopen the portal link.
Not found after login	Stop and contact the Grookai founder. Your account authorization may need verification.
Image does not load	Do not guess. Record the problem in the query note and move to the next query.
A decision is uncertain	Choose the most defensible judgment and add a short evidence note explaining the uncertainty.
Progress disappeared	Check that you are using the same browser profile and device. Use the latest exported JSONL as the recovery record.
